Las Vegas, NV 89102

August 8, 2005

Dear Mr. Rosen,

Thank you for customizing the Mad Science "Exploration" Program to compliment the Science /Technology Week at John C. Bass Elementary School. The main purpose of the week was to share the FOSS Science Program, display student science/technology work, and engage the school community in relevant activities and experiments.

The hands-on science booths/centers you organized and displayed from 7/27/05 through 8/5/05, imparted safe, meaningful and exciting science activities for students from pre-kindergarten through fifth grades. The overview of the activities and the explanation of science principles behind the experiments your staff provided were informative and varied appropriately based on the age group and learning needs of our students.

Students, teachers, and parents are still expressing their excitement about having the opportunity to explore science through the Mad Science program. I sincerely appreciate your support and willingness to help make our Science/Technology Week a real success!

Respectfully,

Sheila Jones-Mosley, Ed. D.
Principal
