Dear Supersonic Scott,

Thank you for all that you did to customize the "Exploration" workshop program for our school. Students in grades K-5th were able to take part in the workshop. It was absolutely amazing.

The hands-on science centers and stations allowed the students to use their eyes and hands to actually get a first hand look at the procedures and outcomes. The hovercraft was a huge hit. We took many pictures of laughing and smiling kids.

The activities and information that your staff provided for our students made it both fun and easy for the students to better understand the concepts. Your staff should be commended.

We look forward to working with you in the future.

Respectfully,

A handwritten signature in black ink, appearing to read "Danielle Ellico". The signature is fluid and cursive, with a large initial "D".
