Mad Science,

Thank you for a wonderful day! The students, staff and PTA at Martin Luther King, Jr. E.S. would like to express how much fun the day was. There were so many activities for the students to participate in, that there was not time for anyone to be bored. It was well organized and the "Scientists" were friendly and knowledgeable. It was awesome how the different grade levels could be mixed and still be able to understand the principles of science being taught.

I heard several teachers say that they wish we would have done it before. They were very impressed with the activities. They also commented that the organization of the overall event was awesome!

In asking several of the students what was their favorite activity the majority of them said it was the hover craft. They said "it felt really cool to float and spin on air". There were several who said they liked the static ball, even if it felt weird! The carbonation "it tasted good and was fun to feel and see how it worked". Spin art was "fun and cool to see."

Again thank you for an AWESOME Day!

Martin Luther King, Jr. PTA President
