

September 6, 2007

To Whom It May Concern:

It is a pleasure indeed for me to share my knowledge of Mr. Scott Rosen and his incredible program, "Mad Science".

I first met Mr. Scott Rosen in August of 2004 when I was looking for an innovative, hands-on science program for our after-school programs. From the very first time I met him, I was impressed with his high level of professional commitment and his willingness to work with us to provide Mad Science to the children in our programs.

For the past three years Mr. Rosen has made it possible for us to offer Mad Science to thousands of children in our after-school programs at some of the most "at-risk" schools in Clark County. This program has proven to be the perfect blend of educational and fun hands-on activities. Teachers and school administrators love the program because it is designed to enhance Nevada's science education by providing fun, interactive, and educational activities that instill a clear understanding of science and how it affects the world around us. Our students love the program because each week scientists, clad in white lab jackets, with names like "Rocket Rhonda," "Carbon Carlos," "Electron John," and "Asteroid Adam," get them actively involved in science while acquiring skills that will improve their academic progress.

After-School All-Stars is proud to be in partnership with such an outstanding organization. I cannot over-emphasize the degree of excellence that Mr. Scott Rosen has contributed to the After-School All-Stars program. I strongly recommend Mr. Scott Rosen and his Mad Science program to you. Please feel free to contact me at 702-382-5447.

Sincerely,

Jacqueline Locks,
