Mad Science Exploration Program;

As the Site Science Representative for our school, I want to thank you for the exciting and educational science program your company brought to our school. The students in all grade levels, K-5, were thrilled with the science centers and the "make and take" experiments they were able to perform. With your terrific supervision of all the centers, our staff was able to explore with their students and take pictures. The staff also appreciated all the set up and clean up that you did.

We would like to highly recommend Mad Science Exploration Program to any school or organization that believes in the promotion of science in the curriculum. We want to thank you for the two workshops that were given as prizes and you will certainly be hearing from our school to book another Mad Science Day for next year.

Sincerely,

Sheila Siino
