March 27, 2006

Our school has had Scott Rosen and his Mad Scientists visit for the past few years. The *Mad Science Exploration Program* is an amazing program where children are engaged in hands-on science experiments. This exploration program allows for every child from K-6th grade to succeed and enjoy the exciting world of science.

Mr. Rosen's team is not only knowledgeable but very professional, and enthusiastic. They sincerely enjoy working with children and helping them understand the science experiments. One student said, "I wish learning science could this fun every day!" We like to have Mr. Rosen and his team visit our school just before our district science fair. His program motivates more children to participate and become involved in our science fair.

I highly recommend *The Mad Science Program* for any school that wants to promote the love of science through an exciting and very educational hands-on program.

Sincerely,

Paige Ernst
