To Whom It May Concern:

I am writing this letter to rave about the Mad Science Explorations program that we had at Lorna J. Kesterson Elementary School last year! What fun the kids had! And they were learning at the same time.

With Mad Science, you know that there will be some hands-on experiences for the students. With the Explorations program, all of our students were able to be a part of multiple hands-on experiences that were extremely engaging; academically appropriate; and taught by very knowledgeable Mad Scientists. Our teachers even had a great time! We look forward to participating in other Mad Science programs that include every student in the learning and fun!

Thank you for all that your programs do for our kids! The learning opportunities that Mad Science provides are so valuable and memorable. Keep up the wonderful work!

Yours in education,

Michele Wooldridge

Principal
