

NOW BOOKING SCHOOL FUNFAIRS & BBQS – NEW (FREE) OPTIONS AVAILABLE FOR 09-10

Mad Science is the world's #1 fun science provider for kids. Fun Fair Stations answer the question Fun Fair Committees are plagued with: how to provide exciting, high quality and educational events without breaking the budget.

OPTION A – FUNDRAISING - Mad Science Make & Take Stations (2 hours)

Choose one of the topics below:

- **Sweet Stuff:** Explore the science of heat and centrifugal force and make Cotton Candy!
- **Wacky Weather:** Assemble your very own UV detector with a Mad Science Sun Bead kit.
- **Super Slime:** Get excited about chemical reactions and polymers while making Mad Science SLIME!

COST – Each experiment costs \$2 (or equivalent # of tickets) and is paid for by people attending your event

What does the school get? 100% value of the revenue generated!

Partner Schools, which offer our Science Club programming throughout the academic year, will receive 50% of the revenue generated in cash, and 50% of the revenue in Mad Science credit.

Non-Partner Schools receive 100% of the revenue generated in Mad Science credit.

For Example, We sell 50 cups of slime at \$2.00 each. Partner Schools will receive \$50 cash and \$50 Mad Science Credit. Non-Partner Schools will receive \$100 in Mad Science credit.

What can the school use the credit for? Mad Science dollars can be used to subsidize up to 75% of the cost of Workshops, Spectacular Science Shows or Science Club Enrollment.

OPTION B - Mad Science Hands On FUNStations (2 hours)

Have a 20 minute Show followed by 90 minutes of Mad Science activities at your Fun Fair for free! The kids won't be making anything or taking anything home, and the school won't be earning Mad Science credit, but having Mad Science for entertainment is a great way to increase the attendance to your Fun Fair.

- **Bubbles Galore:** Let the states of matter amaze and fascinate! Bubbling potions, Great big burps, shivering polar bears and more make the kids squeal with delight!
- **Crazy Chemistry:** Observe chemical reactions happening right before your eyes! Fizzing, smoking, ooey-goey experiments will introduce your students to atoms & molecules.!
- **Under Pressure:** Join Bernoulli and Newton as we take this exciting look at the science behind aerodynamics and the properties of air... under pressure. Use a vortex generator to create air pockets with a punch, and levitate ping-pong balls in defiance of gravity!

COST- FREE!!!

Fill in and fax to 1-866-439-6715 and we'll contact you with full details

School: _____ Fun Fair Date: _____ What time should we start? _____

Which option would you like to book (please circle one): A – Fundraising B – Entertainment
