

MAD SCIENCE EXPLORATION DAY

HANDS-ON SCIENTIFIC DISCOVERY!

MAD SCIENCE EXPLORATION DAY INCLUDES:

-  Four Science Stations that accommodate 80-100 students per hour: **Light Dynamics**, **Magnetism**, **Dry Ice** and **Optical Illusions**.
-  Diffraction Glasses for all the students to use and keep – a great way to see light dynamics in action.
-  Home Learning Extensions that describe the scientific concepts covered and provide additional learning opportunities.

DRY ICE

Explore the states of matter and discover the extraordinary properties of dry ice.

LIGHT DYNAMICS

Learn how light travels and how to split light into the colors of the rainbow.

$$v=at$$

MAGNETISM

Discover the wonders of magnetism, levitate objects and defy gravity.

$$F=ma$$

OPTICAL ILLUSIONS

Investigate reflection, lenses and fascinating optical illusions.

$$E=mc^2$$

Call Mad Science to book your Exploration Day!
