

Preschool Science Fun Stations

Here are just a few examples of our entertaining, hands-on and educational science booths

Dry Ice-Capades – Brrrrr....! Children will take a mad science bubble bath uncover the secret to monster movie fog and taste a Mad Science Burp, while discovering states of matter. They will hear George Washington scream from being so cold and get to make a bubbling potion in their very own cool thermo chromatic plastic cup.

Dino teeth making - Your children get to be paleontologists as they learn about how fossils are copied by making casts and molds and get to take home their very own T-Rex tooth.

Dino fossil Dig – More paleontology as your children will dig for bones and uncover fossils identifying where they come from and from what dinosaur

Budding Bean Necklace – Children will create necklaces made from Kidney beans that really grow and learn about seeds and gardening

Beach in a Bottle – Next time you go to the beach your children will tell you all about its science as at this station children will learn about the unique ecosystem of the beach and all its essential parts while making their own beach in a bottle.

Caterpillar to Butterfly – This ties into the well known preschool book – A Very Hungry Caterpillar. (by Eric Carle) Children will create their very own butterfly in a surprising fold of paper and paint. Very fun and very surprising for them! Children will also be introduced to metamorphosis: From caterpillar to a butterfly.

Lava Lamps – Densities the science of color, and wave action will be all explored here when children will get to make their own lava lamps to take home. A real hit and very cool!

Junior Chemistry - Exploding Colors – Children love to mix and will be introduced to chemistry by as they marvel at the reaction of mixing different liquids and watch colors “explode!”

All About Animals - Children will learn all about animals, adaptation, identify animal sounds and make their own sheet of animal tracks.

Bubble Science - Children will get to explore bubbles with cool demonstrations and by making their own huge bubbles

Polymer Dough – Children will love making their very own polymer with a unique dough recipe. Human polymers will be formed and they will just have to add the “energy” by mixing.

Nerve Tester – Children will get unlock the mystery of static electricity and get introduced to a simple circuit as they test their nerves at this station.
